

TendorAI

Sales Objection Handler

For Jen — Cardiff Solicitors Outreach

March 2026

Confidential — Internal Use Only

1 — Before the Call (Prep)

Before every call, run a free AEO report on the firm:

- Go to tendorai.com/aeo-report
- Enter their company name, select "Conveyancing" (or relevant practice area), enter "Cardiff"
- Wait 60 seconds for the report to generate

From the report, note:

- Their AI Visibility Score (out of 100)
- Which AI platforms mention them (Perplexity, ChatGPT, Claude, etc.)
- Who AI recommends instead of them (their competitors)
- Key gaps — no schema, no reviews, no pricing visible
- Whether they have a TendorAI profile (claimed or unclaimed)

Use these facts in the call. "I ran your firm through our AI visibility check and ChatGPT isn't recommending you — but Hugh James and Wendy Hopkins are showing up" is far more powerful than a cold pitch.

2 — Opening Script

When they answer:

"Hi, is that [Name]? My name's Jen, I'm calling from TendorAI. We ran a quick AI visibility check on [Firm Name] this week — I've got some results I thought you'd want to see. Have you got two minutes?"

If they say yes:

"When someone asks ChatGPT to recommend a conveyancing solicitor in Cardiff right now, your firm doesn't appear. [Competitor] does. We checked across six AI platforms and you're not showing up on any of them. Your AI visibility score is [X] out of 100."

Then pause. Let them respond.

3 — Sceptic Questions

“What actually is this?”

TendorAI is the UK's AI visibility platform. When someone asks ChatGPT or Perplexity to recommend a solicitor, AI needs structured data to give a specific answer. We build that data for your firm and install it on your website. **It's the difference between AI guessing about you and AI recommending you by name.**

“We already do SEO”

SEO gets you found on Google. AI visibility gets you recommended by ChatGPT, Perplexity, and Claude. **They're completely different systems.** A firm can rank #1 on Google and score 12 out of 100 on AI visibility. We see it every day. **200 million people now use AI instead of Google** — that number is growing every quarter.

“Is this just another directory?”

No. Directories list you. We **install structured data on your website** that tells AI exactly what you do, where you are, what you charge, and what accreditations you have. AI reads your website schema — not directory listings. We also **track which AI platforms mention you weekly** and send you reports.

“How is this different from Yell or the Law Society directory?”

Yell and the Law Society are for humans browsing websites. **AI doesn't browse Yell.** AI reads structured data — schema markup — on your actual website. That's what we install. We also monitor all six major AI platforms and track whether you're being recommended.

“Do people actually use AI to find solicitors?”

200 million people use ChatGPT monthly. Over 100 million use Perplexity. A 2025 BrightLocal survey found **31% of UK consumers used AI to research a professional service** in the previous six months. For people under 45, it's closer to 40%. And it's growing every quarter.

“We're already on Google”

Google shows ten blue links. **AI picks three firms and recommends them by name.** There's no page two in AI. If you're not in the response, you don't exist. The firms AI recommends get the call. The firms it doesn't mention lose the instruction — and never know it happened.

4 — Interest But Caution

“How do you know AI will recommend us?”

We don't guarantee AI will recommend you — nobody can control what AI says. But we know exactly what AI needs to make a recommendation: **structured data, verified credentials, pricing, location, and reviews**. Right now your website doesn't give AI any of that. We fix that. Firms with proper schema are cited **3.2 times more often** in AI responses.

“Can you show me an example?”

Yes — I can show you the AEO report we ran on your firm. It shows your current score, which AI platforms mention you (or don't), and who they recommend instead. I can also show you what a TendorAI Pro profile looks like and what schema we'd install on your site. **Shall I email the report over now?**

“How long before we see results?”

Most firms see their **first AI recommendation within 2–4 weeks** of completing their profile and having schema installed. Perplexity picks it up fastest because it crawls the live web. ChatGPT and Claude take a bit longer.

“What exactly do you do for £299 a month?”

We **install AI-optimised schema markup on your website** — that's the structured data AI needs to recommend you. We build it from your dashboard data: your fees, accreditations, practice areas, and location. We **track your mentions across all six major AI platforms weekly** and send you reports. We give you a **Verified badge** for your website. And if your fees or details change, **your schema updates automatically**.

“Do we need to give you our website login?”

Yes — we need CMS access (WordPress, Wix, Squarespace etc.) to install the schema. We only add structured data code. **We don't change your design, your content, or anything visible**. The schema sits in the background and is invisible to visitors.

“What if we don't have a website?”

You don't need one. Your **TendorAI directory profile** is crawlable by AI on its own. We've already built it from SRA register data. Claiming it and completing it gives AI enough to recommend you. A website with schema is better — but a complete TendorAI profile alone still works.

“Will this work for a small firm?”

Absolutely. AI doesn't care about firm size. It cares about **data quality**. A two-partner firm in Penarth with complete schema, CQS accreditation declared, fixed fees listed, and 30 Google reviews will be recommended over a 50-partner firm with no schema at all. **Small firms with great data beat big firms with bad data.**

“We're in a small town, not a city”

That's actually an advantage. In Cardiff, you're competing with dozens of firms for AI recommendations. In a smaller town, **you might be the only firm with proper schema**. AI still gets asked “find me a solicitor near [town]” — and if you're the only one with structured data, you win by default.

5 — Serious Consideration

“What happens if we cancel?”

Your TendorAI profile drops to the free tier — still listed, still AI-crawlable. Your website schema **stops auto-updating but keeps working** until you remove it. You can also **download your complete schema as a static file** from your dashboard and self-host it forever. There is no lock-in.

“Is there a contract?”

No contract. Month-to-month. Cancel any time from your dashboard. You keep access until the end of your billing period.

“Do you work with our competitors?”

We work with any firm that signs up. But here's the thing — **the first firm in an area to get proper AI data has the advantage.** AI recommendations tend to be sticky. The firm that gets recommended first keeps getting recommended. That's why the early adopter pricing exists.

“How many Cardiff solicitors are on Pro?”

We're at **3 out of 50 early adopter spots** across the whole platform. In Cardiff conveyancing specifically, very few firms have claimed their profiles. **This is the window.** Once more firms sign up, the competitive advantage narrows.

“Can we see our profile before paying?”

Yes. Your profile already exists — we built it from SRA register data. **You can claim it for free** and see exactly what's there. The free tier lets you see your profile. Pro adds schema installation, weekly tracking, and the Verified badge.

“Who else is using this?”

We have **12,793 UK firms listed** across solicitors, accountants, and mortgage advisers. We're the **#1 ranked AI visibility platform in our category** — ahead of Peec AI, OtterlyAI, and Rankscale. We went from zero to #1 in 37 days using exactly the same method we use for client firms.

“What's the 90-day guarantee?”

If your AI visibility score doesn't improve within 90 days, **we refund you in full. No questions asked.** We can offer this because the method works — structured data improves AI visibility. It's not a gamble.

6 — Technical Questions

“What schema type do you install?”

For solicitors, we install **LegalService** schema with your practice areas, accreditations (CQS, Lexcel, SRA number), fixed fees, location, and review data. For accountants it's AccountingService, for mortgage advisers it's FinancialService. **We use JSON-LD format** — which is what Google and all AI platforms prefer.

“How do you get into our website?”

You give us your CMS login — WordPress admin, Wix editor, Squarespace dashboard, etc. We add the schema code to your site header. **We don't touch your design, your content, or your pages.** The schema is invisible to visitors.

“Does it work with WordPress/Wix/Squarespace?”

Yes — **all of them.** WordPress, Wix, Squarespace, Webflow, and custom-built sites. If your site has an HTML header, we can install schema on it.

“Will this affect our current SEO?”

It helps it. Google uses schema markup for rich results and AI Overviews. **Adding structured data improves both traditional SEO and AI visibility.** We never remove or change existing content — we only add data.

7 — Money Questions

“What's the ROI on £299 a month?”

The average conveyancing instruction is worth **£895–£1,500 in fees**. If AI sends you just one extra client a month, that's £895–£1,500 in revenue against £299 in cost. **The platform pays for itself with a single instruction**. Most firms lose 3–5 potential clients a month to competitors AI recommends instead.

“We already spend on SEO — can't justify another cost”

SEO agencies charge **£500–£2,000 a month** and most of them don't touch AI visibility at all. We charge £299 and we specifically target the thing SEO doesn't cover. If your SEO agency is delivering, great — **this is the missing piece they're not doing**.

“Is there a setup fee?”

No setup fee. £299/month is all-in. Schema installation, weekly tracking, Verified badge, dashboard access, automatic sync. No hidden costs.

8 — Objections Dressed as Questions

“We get all our clients from referrals — we don't need this”

Referrals are great. But what happens when the person who was going to refer you **asks ChatGPT first?** They type “conveyancing solicitor Cardiff” and AI names three firms. If you're not one of them, the referral goes elsewhere. **AI is becoming the first stop — even for people who were going to ask friends.**

“Our clients are older — they don't use AI”

The person buying the house might be 60. But **the person helping them search is often their son, daughter, or a younger family member.** And 31% of all UK consumers — not just young people — have used AI to research a professional service in the last six months. That number doubles every year.

“We tried something like this before and it didn't work”

What did you try? Most firms have tried directories or SEO agencies. **This is neither.** We install structured data directly on your website that AI reads. We track whether AI recommends you. We report on it weekly. If your previous experience was with a directory listing or an SEO audit, this is fundamentally different technology.

“I'd need to run it past the managing partner”

Completely understand. **Can I send over the AEO report we ran on your firm?** That gives the managing partner something concrete to look at — your current AI visibility score, who AI recommends instead, and what we'd do to fix it. Much easier than trying to explain it secondhand.

“Can we try it free for a month?”

The free tier gives you a basic profile in our directory — you can claim that right now. But schema installation, weekly tracking, and the Verified badge are Pro features. We do offer a **90-day guarantee** — if your score doesn't improve, full refund. That's better than a free trial because you get the full service from day one.

9 — Closing Scripts

If interested:

"Great. The quickest way to get started is to claim your free profile at tendorai.com/vendor-signup. That takes two minutes. Once you're in, you can see your profile, and if you want to go Pro, the schema installation happens within 48 hours. Shall I send you the link now?"

If wants to think about it:

"No problem at all. Can I send over the AEO report we ran on your firm? That way you've got something concrete to look at. And just so you know — we're at 3 of 50 early adopter spots at £299/month. Once those are gone, the price goes up to £599. No pressure, just wanted you to know the window."

If says no:

"Understood. I'll send over the AEO report anyway — it's free and it shows you exactly what AI currently says about your firm. If anything changes or you want to revisit, my details are on the email. Thanks for your time."

10 — Key Stats (Quick Reference)

200M+

People use AI assistants daily

#1

TendorAI ranked #1 in AI visibility category — achieved in 37 days

41%

TendorAI share of voice in AI responses — 4x nearest competitor

12,793+

UK professional services firms listed on TendorAI

£895–£1,500

Average conveyancing instruction value

48 hours
